PROFESSIONAL SUMMARY

Full-Stack Web Developer with 2+ years of experience building scalable SaaS, hospitality, and e-commerce applications using Next.js, TypeScript, Node.js, PostgreSQL, and MongoDB. Experienced in AI-powered solutions including OCR automation, chatbot systems, and workflow optimization. Passionate about performance, clean architecture, and solving real business problems through technology.

TECHNICAL SKILLS

Languages: - JavaScript (ES6+) - TypeScript - SQL - HTML5 - CSS3	Backend Development: - Node.js - Express.js - REST APIs - Mongoose Databases: - PostgreSQL - MongoDB - MySQL AI & Cloud Integration: - AI API Integration (OpenAI/Gemini), - Prompt Engineering, - Firebase, Cloudinary	Tools & Security: - GitHub - JWT - React Query - Zod - Axios - Framer Motion - Figma Familiar Platforms: - Python - Java - Flutter - WordPress - PHP
Frontend Development: - React - Next.js - Redux - Tailwind - CSS - ShadcnUI - Bootstrap		

PROFESSIONAL EXPERIENCE

Web Developer (Promoted)

X-group Chain Restaurant & Hospitality Management (May 2025 – Present)

Web Developer:

- Architect and maintain high-performance full-stack web applications utilizing TypeScript, React, and Node.js.
- Engineered an AI-driven Chatbot using the Gemini model to automate customer inquiries and restaurant reservations.
- Developed an AI-powered OCR system to digitize handwritten guest feedback, significantly streamlining sentiment analysis and reporting.
- Designed and optimized relational database schemas with PostgreSQL to handle complex data structures and improve query performance.
- Leveraged AI automation to optimize internal hospitality workflows, reducing manual data entry and improving operational efficiency.

Junior Web Developer:

(December 2023 – May 2025)

- Developed responsive and interactive UI components using React, Tailwind CSS, and modern frontend libraries.
- Collaborated on backend API configurations and debugged frontend issues to enhance platform stability and user experience.
- Integrated third-party APIs and optimized website assets for faster loading and SEO performance

TECHNICAL PROJECTS

1. X-Mart SuperShop – E-Commerce Platform

[\[Live Link\]](#) | [\[Client Code\]](#) | [\[Backend Code\]](#)

Description: A production-ready full-stack e-commerce solution with a layered backend architecture and an automated admin dashboard, engineered for seamless multi-branch operations and secure online transactions.

Key Features:

- **Multi-Branch & Geo-Location:** Real-time inventory tracking per branch with MongoDB geospatial queries for outlet locating.
- **Secure Auth & Role Control:** Advanced JWT access/refresh token flow backed by role-based Next.js Middleware.
- **Payment & Automation:** Integrated SSLCommerz gateway with webhook handling and node-cron for automated database cleanup.
- **Performance & Security:** Server-state caching via React Query, runtime Zod validation, and API rate-limiting/security headers.

Technologies: Next.js 16, TypeScript, Node.js, Express.js, MongoDB (Mongoose), Tailwind CSS, NextUI, SSLCommerz, TanStack React Query, Zod, JWT, Pino, node-cron.

2. Feedback Card Reader (AI-Powered OCR)

[\[Live Link\]](#)

Description: An AI SaaS application designed to digitize handwritten guest feedback cards into structured digital data and real-time sentiment insights.

Key Features:

- **AI OCR:** Leverages Gemini latest model for high-accuracy handwriting recognition and sentiment analysis.
- **Custom Scanner:** Features an in-browser camera with live preview and optimized image compression for fast uploads.
- **Analytics:** Integrated Recharts dashboard to visualize extraction confidence and customer satisfaction trends.
- **Modern UI:** Built a highly responsive glassmorphism interface using Next.js 16 and Tailwind CSS v4.

Technologies: Next.js 16, React 19, Tailwind CSS v4, Google GenAI SDK, Recharts, browser-image-compression.

3. Gadget Load (Real-World Client E-Commerce)

[\[Live Link\]](#)

Description: A production-grade e-commerce application developed for a real-world client, featuring a serverless backend and a modern frontend with dynamic invoicing.

Key Features:

- **Architecture:** Built a modular backend using Express 5 tailored for Vercel Serverless Functions, with a mobile-first Next.js 16 and React 19 frontend.
- **Data & Validation:** Managed server-state caching via React Query v5 and enforced strict runtime validation using Zod v4.
- **Admin Dashboard:** Integrated Recharts for sales data visualization and implemented automated PDF invoice generation via jsPDF.
- **Enterprise Tracking:** Integrated marketing tracking via Facebook Pixel and production logging using Winston (daily rotate file).

Technologies: Next.js 16, React 19, TypeScript, Express 5, MongoDB, Tailwind CSS v4, shadcn/ui, React Query v5, Zod v4, Winston, jsPDF.

EDUCATION

Diploma in Computer Science & Engineering (CSE)

Chattogram Polytechnic Institute

Dates: - 2023
CGPA: 3.56 / 4.00

Secondary School Certificate (SSC) – Science
Shantirhat High School | Graduated: 2019

Dates: - 2019
GPA: 4.61 / 5.00

LANGUAGES

Bangla: Native / Bilingual Proficiency

English: Professional Working Proficiency
